February has long been celebrated as the month for love, but nothing tops the infatuation we have with chocolate... And that love comes full circle when we pair February with Chocolate & Donuts!

✓ **IDDBA** reports that indulgence is still driving bakery sector growth... And nothing tops chocolate for pure decadence.

✓ **The National Restaurant Association** named doughnuts with non-traditional fillings one of the 10 trends that are heating up for 2018.

✓ Chocolate releases endorphins in the brain making people feel good all over — similar to a feeling of being madly in love. While chocolate might not be a perfect love substitute, it's one of the best alternates you'll find produced in mass quantity!

Let Lawrence Foods lead you to true love...chocolate icings so rich and smooth that they're loved both back-of-the-house **and** by your patrons.
